Re | FMC Ask Me 3/Teach Back Study

Congratulations to the Forsyth Medical Center's Stroke Center team!!!!

Research conducted at Forsyth Medical Center's Stroke Center on Ask Me 3 (TM) and Teach Back has been published in the March edition of Stroke Magazine. The study entitled "Assessing the efficacy of Ask Me 3TM/ Teach Back in educating patients who suffered a cerebral event" was published along with the other abstracts of posters presented at the International Stroke Symposium earlier this year. Please take a minute to tell Allison Hooker and Tom Bauer congratulations on the work that they did on this research project for the presentation at the American Stroke Association which led to the publication. Great job!

I also want to thank our entire Neurosciences team and everyone at FMC who help to care for our neuro patients every day. We certainly could not have such great results like this and our Gold Plus Honor Roll if it were not for everyone who works so hard to provide remarkable care to our patients every day.
